Knowledge Organiser homework is based on self-quizzing. It is expected that you complete one page of self-quizzing, every day in your practice book. This should take around 30 minutes as a minimum. You need to self-quiz on the correct segment, based on your homework timetable. You should not leave blank lines on the page, including in between pieces of information. The information you self-quiz should be numbered in your practice book with the same numbers used on the Knowledge Organiser. Tutors will be looking for a full page of self-quizzing on the correct numbers of the Knowledge Organiser, as well as for green pen ticks/corrections and good presentation. On the top line of the page, you should write the subject which you are completing, the set and the date on the right hand side. Underline everything with a ruler. Your writing needs to be neat and legible. Tutors will check your practice book each morning. If we feel that any of these elements are not up to standard, you will be issued with a 30 minute, same day, detention. The knowledge that your teachers have selected directly correlates with the knowledge you are learning in class. You will be tested on this. The harder that you work, the more successful you will be.

These are the steps you should follow to complete effective self-quizzing:

look ☑ cover ☑ write ☑ check

1. Identify the Knowledge Organiser segment for the day you are on. This is on your homework timetable.
2. Open up your practice book and on the top line, write the subject which you are completing, the set which you are completing and the date on the right hand side. Underline everything with a ruler.
3. Place your Knowledge Organiser segment in front of you. Start with the first numbered piece of information within the segment. Read and memorise the piece of information. Repeat this process several times, until you are confident enough to use your practice book to write the knowledge point down.
4. Close your Knowledge Organiser or cover up the piece of information, and try to recall the knowledge. On the line directly beneath, write the correct number from the Knowledge Organiser and the piece of information from memory. There are to be no blank lines in your practice book.
5. Check it and correct any mistakes. Open up your Knowledge Organiser and look at the piece of information – using a green pen tick the piece of information in your practice book if you have recalled it correctly (word for word, correctly spelled). If you have incorrectly recalled or missed any part of the information, use your green pen to put a cross next to that knowledge point.
6. If you recalled the piece of information incorrectly, go back to step 3 and in green pen, repeat the process again for the same piece of information (remember to cover up previous attempts in your practice book as well as the piece of information in your Knowledge Organiser). When you have recalled the information correctly (word for word), tick the attempt and move on to the next piece of information within the weekly segment. You may find that you need to complete a few green pen attempts before you recall the knowledge point word for word.
7. Repeat the steps above until you have recalled and written down all pieces of information within the weekly segment. If this has not filled one full page of your practice book, go back to the first piece of information within the weekly segment and repeat the process again, until you have filled an entire page.

Open up your Sparx book and on the top line, write the Task Number and the Date on the right hand side. Underline everything with a ruler. Draw a margin for your book codes. For every question, you must write your book code, working and your Definition.
